## Objective

Enthusiastic Computer Science undergraduate seeking a software development internship to apply and expand problem-solving skills in Java and full-stack web development.

## Education

University of Agriculture, Faisalabad  
Bachelor of Science in Computer Science (BSCS)  
Expected Graduation: 2026  
Current CGPA: 3.1

## Skills

- Programming Languages & Frameworks: JavaScript, React, Next.js, Express.js, Java (DSA)
- State Management: Redux, Redux Toolkit
- Styling: Tailwind CSS, Bootstrap
- Tools & Platforms: Firebase
- Version Control: Git, GitHub
- Problem Solving: Solved 120+ DSA problems on LeetCode using Java

## Projects

- Stock Management System – Developed a full web app to manage customer records and factory stock; generates monthly reports as PDF. [Live Demo](#)
- NovaTech – E-commerce website built with Next.js and Firebase for product listings, cart features, and authentication. [Live Demo](#)
- Online Voting System – Facial-recognition voting platform allowing secure registration, candidate management, and vote casting. [Live Demo](#)
- Tips and Experience Share for UAF – Social platform for UAF students to share academic tips and experiences. [Live Demo](#)
- Kisan Dost – MERN stack project providing information about government loans and a discussion forum for farmers. [GitHub Repo](#)

## Hackathon Submissions

- NASA Space City Hacks – Designed a game for astronauts living in microgravity environments.
- Meta Hacker Cup – Demonstrated skills in competitive programming and problem-solving.

### **Certifications**

- Web and Mobile App Development – Saylani Mass IT Training (SMIT)

### **Achievements & Activities**

- Participated in hackathons including Meta Hacker Cup and GPT 4.0 Hackathon.
- Gained hands-on experience through collaborative team projects.
